Nguyễn Khánh Duy

Frontend Developer Intern

PERSONAL INFORMATION

Phone: +84 815 934 934

Date of Birth: 23 Aug 2003

Email: nguyenkhanhduy23803@gmail.com

Location: Cu Chi District, Ho Chi Minh City, Vietnam

EDUCATION

FPT Polytechnic College

Major: Web Programming

GPA: 3.79 / 4.0

FPT Education
FPT POLYTECHNIC

2023 - 2025

SKILLS

Soft Skills

Presentation, communication, and teamwork skills
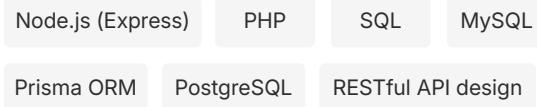

Problem-solving, creativity, and time management

Technical Skills

Frontend

| HTML | CSS | SASS | Tailwind CSS | Bootstrap |
| JavaScript | TypeScript | React | Next.js | Angular |

Backend & Database

| Node.js (Express) | PHP | SQL | MySQL |
| Prisma ORM | PostgreSQL | RESTful API design |

DevOps & Tools

- Git, GitHub, Docker, npm, Composer

UI/UX

Basic UI design with Figma (wireframes, simple layouts, components)

CAREER OBJECTIVE

Short-term:
Apply for a Frontend Developer Intern position to gain hands-on experience in real-world product development, improve skills in HTML, CSS, JavaScript, and modern frontend frameworks.

Long-term:
Build strong frontend expertise and gradually expand into backend development, with the goal of becoming a Fullstack Developer capable of contributing to the entire software development lifecycle.

WORK EXPERIENCE

SPX Express   **2021 - 2023**

Analyst, Sorting

- Checked shipment information and tracking codes
- Reported abnormal cases, including incorrect codes and missing items
- Supported optimization of the sorting workflow

Beverage Shop   **2023 - 2024**

Service Staff

- Served customers and handled orders
- Communicated effectively and worked well in a team
- Developed discipline and time management while studying and working

PROJECTS

Personal Skill Portfolio (PSP)

Type: Personal Projects Collection
Technologies: HTML, CSS, JavaScript (Vanilla)
GitHub: https://github.com/Nkduy23/Personal-Project
Projects included:

- **Dashboard Analytics:** Built a dashboard UI to display summary data and dynamic charts
- **Advanced Todo App:** Developed a task management app with add, delete, edit, and filter features
- **Quiz App:** Created an interactive quiz application with multiple-choice questions and score calculation
- **Image Gallery:** Built an interactive image gallery with transition effects and image preview
- **Weather App:** Developed a weather application that fetches data from an external API and displays weather by city

GUTHANHLICH – E-commerce Web Application

Type: Personal Projects Collection
Technologies:
Frontend: HTML, Tailwind CSS, React.js
Backend: Node.js (Express), MongoDB
GitHub: https://github.com/Nkduy23/GuThanhLich

Description:
- Built RESTful APIs using Express.js to manage products, users, and orders
- Implemented authentication features (Login / Register) using JWT for secure user access
- Developed frontend features with React.js, including shopping cart management, pagination, and product filtering

Team Project: Electro – PHP Native MVC E-commerce

Role: Team Leader & System Architect
Technologies: HTML, SCSS/CSS, PHP (Native MVC), MySQL, Composer, npm
GitHub Organization: https://github.com/ElectroDev6/Electro
Description: A full-featured e-commerce website built with a pure PHP MVC architecture, focusing on system stability and scalability.

Key Contributions & Leadership:
- Designed the overall system architecture, including folder structure and a standardized native PHP MVC pattern
- Built a custom routing mechanism to manage URLs and application flow
- Designed the MySQL database schema and set up CLI tools for database migration and seeding
- Developed core frontend UI/UX for key pages such as Home and Product Detail pages
- Implemented a complete checkout workflow, including a simulated VNPay payment integration

Team Project: NhaMayMan-Hanh – Modern E-commerce Platform

Role: Team Leader & System Architect
Technologies: Next.js & Tailwind CSS (FE), Node.js (Express), MongoDB, Zod (BE)
GitHub Organization: https://github.com/NhaMayMan-Hanh
Description: A fundraising-oriented e-commerce platform built with modern frontend and backend technologies.

Key Contributions & Leadership:
- Designed and implemented the backend architecture using a modular structure (Services, Controllers, Middlewares)
- Implemented strict data validation using Zod and JWT-based authentication with role-based authorization (User/Admin)
- Built RESTful API endpoints and integrated data fetching with the Next.js frontend
- Led the team by organizing code structure, defining technical direction, and coordinating frontend and backend development

Graduation Project – ChoCongNghe Platform (In Progress)

Role: Team Leader & Backend Developer
Team size: 6 members
Technologies:
- **Frontend:** Next.js, Tailwind CSS
- **Backend:** Node.js (Express), Prisma ORM
- **Database:** PostgreSQL
- **Infrastructure:** Docker, RESTful API

GitHub Organization:
- **Server:** https://github.com/ChoCongNgheTeam/cho-cong-nghe-web-server
- **Client:** https://github.com/ChoCongNgheTeam/cho-cong-nghe-web-client

Key Responsibilities & Contributions:
- Designed overall system architecture for both frontend and backend
- Led task planning, task assignment, and code structure conventions
- Built RESTful APIs using Express.js with Prisma ORM
- Designed PostgreSQL database schema and relations
- Dockerized backend services for consistent development environment
- Collaborated with frontend team to define API contracts

INTERESTS	CERTIFICATIONS

- Learning new technologies
- Running & walking
- Music

● **2025**

JavaScript Algorithms and Data Structures Certification
